

The following is a link to a Kindergarten Readiness Checklist that can be printed out at any time. The checklist contains a list of skills across all development areas for children getting ready to enroll in Kindergarten, as well as many helpful tips for parents of pre-kindergarteners. Remember, all children develop at their own rate, so you may notice that there are certain skills that they have mastered and some skills that still need practice. Spending time with your child to help them prepare for Kindergarten is not only fun, but rewarding as well! If you have any questions or concerns please let me know!

Enjoy!
